### A PLAYER'S GUIDE TO THE HOUSE EDGE

The House Edge is a measure of how much the House expects to win, expressed as a percentage of the player's wager. For example, in a wager with a House Edge of five percent the player will lose on average over time, £5 for every £100 wagered. House Edges vary by region, casino, and game. In some games, player betting or skills decisions can affect the Edge, but it is important to keep in mind that the House always has some advantage against the typical player.

HOUSE EDGE – 23.93%
