

'TRIPLE ZERO' AMERICAN ROULETTE

The rules for 'Triple Zero' American Roulette at this casino, set out below, are our commitment to the players in ensuring that the gambling we offer is 'Fair and Open'. In the event of a dispute resulting from any ambiguity in the rules, the decision shall always be in the player's favour until that ambiguity has been resolved.

- The player plays against the House.
- The game of Roulette is played with a wheel, which has been divided into 39 equal compartments, 000 (replaced by M logo), 00 & 0-36 inclusive, and one ball.
- The wheel is spun in one direction by the Dealer and the ball is always spun in the opposite direction.
- The players can place their bets on the layout either before the ball is spun or during the time that the ball is spinning but may not place, change or alter any bets after the Dealer has announced 'No more bets'.
- All wagers placed are only valid for one spin.
- Should a 'No spin' occur, then the wagers on the layout are void and will be valid for the next spin.
- Players may place their wagers on the following options on the layout as shown below.
- The wagers, if won, will be paid at the following odds shown below:
- When the winning number is zero or Double zero or triple zero ('M' logo); half of each wager on any even chance bet (those wagers if won being paid at odds of 1-1), shall be lost to the House and the remaining half returned to the player.
- When the ball has settled in a number, that number is deemed to be the winning number and the players are paid out at the appropriate odds by the Dealer. [See table of Roulette odds].
- Any bets not associated with the winning number are lost and surrendered to the House.
- All wagers must be within the specified minimums and maximums displayed at the table.
- Partnerships with a view to exceeding the maximum stake shall not be permitted.
- The accuracy of the number display cannot be guaranteed.

A PLAYERS GUIDE TO THE HOUSE EDGE

The House Edge is a measure of how much the House expects to win, expressed as a percentage of the player's wager. For example, in a wager with a House Edge of five percent the player will lose, on average over time, £5 for every £100 wagered. House

Edges vary by region, casino and game. In some games, player betting or skills decisions can affect the Edge, but it's important to keep in mind that the House always has some advantage against the typical player.

THE HOUSE EDGE FOR '000' AMERICAN ROULETTE:
